S2T GRASS
REINFORCEMENT

Interlocking PE-PP Tiles Effective ground reinforcement systems

Advantages

- § durable, all weather surface which prevents rutting
- § can normally be rolled into unprepared soft grass surface
- § secure interlocking tiles prevent standing edges
- § textured surface for safe grip
- § excellent load bearing and weight distribution properties
- § can withstand loads of up to 40 tonnes/m² once laid
- § grass grows back through the tiles in a short time
- § preserves the character of the environment
- § tiles allow water to pass through them
- § natural drainage maintained
- § tiles do not rot
- § resistant to frost, acids, solvents and heat
- § planning permission not normally required
- § no special tooling or skills required for installation
- § easy to install yourself in a short time, tiles clip together
- § no splintering or risk of injury
- § low cost when compared to alternative options

Easy to install in 3 simple steps

Transforms soft ground
into a stable base

Grass grows back
through the tiles
